

Good Soil Tilth = Good Microbial Environment = Good Yields!!!

Build Your Humus Where Other Tillage Tools Fail

Manufactured in virtually every size and working depth for small fruit production, greenhouses, vegetables, orchards, vineyards, and field crops. Join the thousands of satisfied Imants owners around the world who have already switched to this proven technology for healthier soil and more profitable farming.

Only an Imants spader will:

- Efficiently "double dig" your soil, completely fracturing hardpans, improving soil structure and aggregation
- Optimally incorporate green manure, crop residue, straw, compost, and other soil amendments into the most active soil profile
- Dramatically increase water and air infiltration, therefore improving moisture retention, root growth, soil biological activity
- Perform primary and secondary tillage in one pass, lessening compaction and reducing time requirements considerably
- Permit "biologically correct" tillage on all soils and conditions. Working widths from 4 to 15 feet available.
