Subject: Internet Scam Status and Analysis_Complete

CONFIDENTIAL AND PROPRIETARY:

Professor Neal Rothman
Indianapolis, IN.

Dear Brother Neal:

As you know I am greatly appreciative for your financial support allowing me to work for \$20/week landscaping your home, provision of legal address and opportunity to purchase the Toshiba laptop in my possession now as I finalize the "Dietary Cholesterol Diseases and Syndrome" e-book.

I have attached my **Resume** file so that you can analyze whether I am as the Internet says an Internet fraud and/or Internet scam victim in regards the **2007 EUHG gift to pay the fee and award of 2.3 M Euros** issued by the

EU/Special Programmes Body (SPB) as part of the **UN Millennium Project** targeting ending world poverty affecting 45% of the world's population **living on \$3/day or less as my wife Nancy and I have been forced to.**

My **Resume** when objectively studied and verified is documented by third party videos linked on my web site at <http://www.theuniversityofgod.org/Page9.org> and together clearly establish me as a legitimate *poverty reduction* specialist with four federal grants received and carried out successfully between 1979 to 1995.

In 1997 and 1998 I was attacked by the US government and slandered and my ability to receive federal or private foundation grants ended as documented on <http://theuniversityofgod.org/Page22.html> and covered by the press article attached.

However, you and your daughter's friend who works for the EU have kindly spent time and resources on this situation and have determined I am part of an Internet fraud as a scammer and/or victim.

In the mean time some contradictory facts have surfaced which makes this obvious conclusion suspect:

1.) medical authorities took my Mother out of our apartment __ she and my name were on the lease__ in June 2008 __ on the grounds I was abusing her not allowing her to have meat although:

a.) my Mother had breast cancer with total mastectomy, had gangrene in her feet and legs and gallstones; and

b.) I as a legally trained herbalist presented conclusive proof that eating animal flesh causes breast cancer, gangrene and gallstones.

Note: This caused me to be homeless as my paid for the apartment in return for 24 hour and 7 day a week home health and maintenance services.

Note: My Mother dies on my birthday on 1/13//2010 from the complications from the "emergency" gallbladder removal operation required in just 6 months
